

Great tip. Every member with a Mac should check the settings on their machine...

Apple World Today **Are you getting OS X security updates?**

Adam C. Engst over at [TidBITS.com](http://TidBITS.com) wrote a nice little article called, Make Sure You're Getting OS X Security Data. You should probably read it; if you're not going to, here's the App Store System Preferences pane showing the checkbox you want to enable to insure that OS X security updates are installed automatically:

This nugget of info is from my "Working Smarter for Mac Users" newsletter. You can [sign up for free](#) and get free timesaving tips, and more, every week.
